SUMMARY

I'm a Mobile Software Engineer with 9+ years of experience specializing in Android. I develop applications using the latest technology in the Android environment and ensuring robustness and making projects scalable, maintainable, agile, and adaptable to new market demands. I have experience working across various companies in industries including food, sales, commerce, and finance. I love learning new technologies and applying this know-how in my projects. I'm looking for a company that can provide a good environment and rich cultural experience, share my knowledge and skills, and learn from them. Working with the top Android environment to help the company reach its goals.

EXPERIENCE

Android Software Engineer, Caixa (Outsourced by Quintess)

11/2024 - Present Day

Outsourcing Caixa Econômica Federal, also known as CAIXA, is a Brazilian financial institution, in the form of a public company, with its own assets and administrative autonomy.

- Migration of an Android application to a new language, architecture, and the latest Android environment using Kotlin, MVVM + MVI + Clean Architecture, UseCase Pattern, Jetpack Compose, Compose Navigation, Hilt, Coroutines, Retrofit, OkHttp, Interceptor, mockk, and Espresso. This will improve scalability, maintainability, and user-friendly interfaces.
- Lead the Android team to build new features.
- Participate in meetings to refine business and technical features to give the team the best documentation to implement them.

Android Software Engineer DIGIO (Outsourced by Datum)

02/2023 - 11/2024

Digio is a multi-service bank that operates through a digital platform for individuals. Banco Digio offers financial services such as digital checking accounts, credit cards, insurance, loans, and private label card management, among other services.

- I redesigned the FGTS Government Loan module feature, updating the XML views to utilize the latest modern Google feature UI, Jetpack Compose views. As a result, this improved the best usability and friendly flow for the final users.
- Created a new Loan feature in the Android app using Kotlin, Jetpack Compose, MVVM + Clean Architecture, and UseCase Pattern, giving new ways for the customer to get a new loan from the bank.
- This feature increased the recipients and income for the bank.

Android Software Engineer BS2 Banking (Outsourced by Innvo Labs)

12/2021 - 01/2023

Banco BS2 is a digital bank for companies that offers financial services in credit, cash management, foreign exchange, payment solutions, and insurance.

- Created a feature to manage Pix keys using a new module Android, Kotlin, MVVM + Clean Architecture, and Jetpack Compose, Room, and Retrofit API REST. This feature saves new keys, updates existing ones, and deletes them. This helped the users to find and use your keys, saved time, and decreased help desk support.
- Created an Onboarding feature for new users. Every time a new user downloads the app from the store, this feature shows up when the user opens the app for banking.
- As a result, the application reduced the number of negative comments in the review app on the Google Play Store.

Android Software Engineer Unidas (Outsourced by BliteTi)

09/2019 - 10/2021

- Created a new Android module using Kotlin, MVVM + Clean Architecture, and UseCase Pattern to integrate into a Flutter application. This feature makes a payment integration with the machine payment system. This feature reduces the time to make payments and finish the process of delivering and picking up a car from the store.
- Created a new feature to integrate the app rent a car with the external SDK and API to make integration with the Shell Box system.
- This feature allows the user to use the app to get the best prices and promotions to buy gasoline.

EDUCATION

Graduate course analysis and systems development
University Estácio de Sá | Fortaleza, CE

, 12/2015

LANGUAGES

- English Professional working proficiency
- Portuguese Native or bilingual proficiency
